TSC Truck, Inc. is an official
dealer for Maurer Mfg.

Maurer steel grain trailers are equipped with LED sealed beam lights. Every light is mounted in a shock proof rubber grommet. Combine this with our wiring system and you can plan on years of trouble free use. Note the unitized corner which is an exclusive feature on Maurer steel grain trailers.

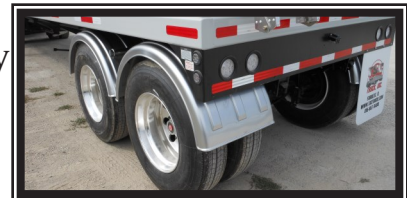

Drop Leg Landing Gear Available on 24' & 28'

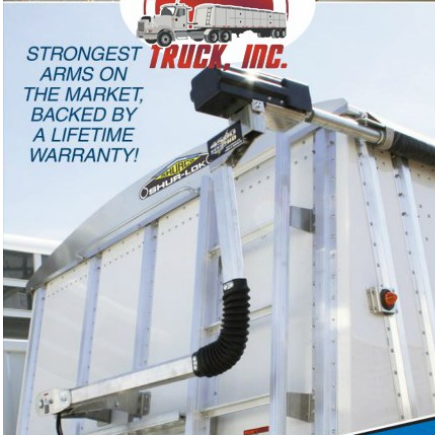

Add value and longevity with the help of TSC Truck and our partners at ShurCo and Minimizer.

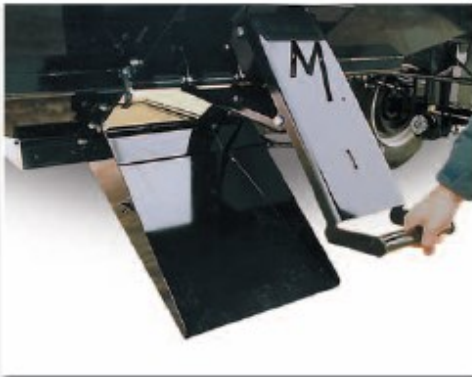

- ShurCo's Tarp Systems are the industry standard and offer a variety of technology to make harvest convenient and hassle free. Order your Maurer with ShurCo electric tarp & traps or have TSC Truck install it on your existing trailer.
- Minimizer's poly fenders keep flying rocks off the underside of the hoppers. Maurer's protective undercoating works great when still intact.

STRONGEST ARMS ON THE MARKET, BACKED BY A LIFETIME WARRANTY!

Optional Maurer Side Discharge Chute

A Maurer side discharge chute has 9 inches of discharge height and 35° of slope while still reaching within 2" of the side of the trailer. These traits make this side discharge the most user-friendly on the market!

The hoppers on Maurer steel grain trailers are built to receive a retrofit side discharge chute. Anytime during the life of your trailer you can order a chute and add it to your trailer.

Adding this retrofit side chute is a simple assembly, cutting the discharge hole in the left side of the hopper and then bolting it on.
